SCAFFGAP NAMED FINALIST IOSH AWARDS 2009

Scaffgap has been named a finalist in the category 'Innovation of the year' in the SHP IOSH Awards 2009. This is in recognition of the impact the product has had on the Scaffolding industry in enabling compliance with The Work At Height Regulations 2005 and TG20/08 regarding gaps in a working platform.

Scaffgap has become widely used in a short space of time in the Petro-Chemical

industry where it is vital that the chances of objects falling through the 50mm gap in the working platform, created by the inside standards, is kept to an absolute minimum.

Judges looked at the scale of the achievement and how well it has worked rather than how much money or other resources were spent on it.

The finals ceremony takes place in the salubrious surroundings of the Park

Lane Hilton, London on the 21st October 2009 where we are hopeful of a positive result!

2012 Olympic Project Specifies ScaffGap

ScaffGap Ltd and George Roberts Ltd were invited onto the project to demonstrate Work at Height Safety Solutions.

Following a review of Work at Height Safety, on the Olympic project, the Health and Safety Assurance team

advised all Principle contractors on the inherent risks on working platforms.

ScaffGap was specifically specified following a recent incident caused by the 50mm gap on a scaffold platform

The H&S Assurance team advised; the solution to covering gaps within working platforms is by using ScaffGap.

ScaffGap Ltd is very pleased on the interest shown by all the major contractors.
